—THE MATRIX (1999)

Mixed Greens is thrilled to present *X,* our tenth anniversary exhibition. Back in 1999, Paige West (our Neo) founded Mixed Greens as a place to support emerging artists. What began as an online-only entity has, over the last decade, organically morphed into a traditional gallery. We've pioneered gallery e-commerce, traveled shows, organized panel discussions, hosted events, and produced educational catalogs in an effort to push the boundaries of what a gallery can do.

We currently represent 22 artists, but over the years, we've worked with over 100 artists at varying stages in their careers, and (call us crazy!) we've decided to put them all in one BIG anniversary show. With *X,* we present a large selection of the many amazing artists with whom we've been privileged to work. Their techniques and subject matter vary widely, but all of these artists captured our attention either by their extraordinary use of materials or through their deep examination and investigation of their subjects. There is no theme uniting the 84 participating artists—the only common denominator is Mixed Greens. Some might call it narcissistic. Others nostalgic. We consider it to be a celebration of some of the best artists working today.
